Professional Summary

Final-year B.Tech Computer Science and Engineering (Data Science) student with hands-on experience in Python, machine learning, cybersecurity, and full-stack web development. Developed and deployed real-world applications including healthcare analytics dashboards, secure encryption platforms, and online voting systems. Skilled in building data-driven applications, automation solutions, and interactive web platforms using modern development tools and frameworks.

Technical Skills

Programming: Python, HTML, CSS, JavaScript (Basic), SQL

Frameworks & Tools: Streamlit, Flask, Django, Git, GitHub

Machine Learning: Scikit-Learn, Pandas, NumPy, Data Processing, Data Visualization

Databases: SQLite

Soft Skills: Communication, Problem-Solving, Team Collaboration, Client Interaction

Languages: English, Hindi, Telugu

Projects

Advanced Encryption Tool:

Python, Flask, SQLite

- Developed a secure file encryption and sharing platform using AES-256 encryption and OTP-based authentication.
- Implemented secure file sharing, activity tracking, bulk encryption, and user management modules.
- GitHub: Advance-Encryption-Tool

Blockchain-Based Online Voting System:

Python, Streamlit, SQLite

- Designed and developed a secure voting platform with OTP verification and role-based access control.
- Implemented candidate management, vote counting, and result visualization dashboards.
- GitHub: online-voting-system
- Live Demo: Streamlit Application

Smart Blood Pressure Monitoring Dashboard:

Python, Streamlit, Scikit-Learn

- Built a machine learning-based healthcare dashboard for blood pressure estimation and monitoring.
- Deployed the application using Streamlit Cloud for public access.
- GitHub: smart-bp-monitoring
- Live Demo: Streamlit Application

Education

B.Tech in Computer Science and Engineering (Data Science) KG Reddy College of Engineering and Technology
CGPA: 7.61 Expected Graduation: 2026

Certifications & Achievements

- Artificial Intelligence for All – IUCEE Foundation (2025)
- Microsoft Office Certification – Udemy
- Runner-up, Data Wizard Competition, IKARUS National Level Technical Fest 2024.
- Participated in Kalam's Space Convention 2K25 Career Enhancement Programme.

Areas of Interest: Artificial Intelligence, Machine Learning, Data Engineering, Cybersecurity, Automation, Full-Stack Development
